Summary

As a software developer , I build business solutions using modern technologies such as PHP, JavaScript, Python, React, and Flask. I have developed several projects over the years, where I have demonstrated my ability to analyze complex problems, design effective solutions, and write clean and maintainable code.

I have also earned certifications in Web Development, Web Security, and Developing for Blockchain from IBM, which showcase my passion for learning and applying new skills and knowledge to the workplace. I am a team player who enjoys collaborating with others to achieve project goals, and I value clear communication and effective feedback. I am strongly passionate about innovative ideas and problem-solving using programming technologies, and I aspire to grow as a software developer.

Experience

Web Developer

TrailerPeak

Jan 2020 - Present (3 years 11 months)

TrailerPeak offers a personalized and immersive movie trailer experience, catering to the diverse tastes and preferences of film enthusiasts. The website utilizes advanced recommendation algorithms to curate a tailored selection of trailers based on users viewing history, genre preferences, and ratings. By delivering highly relevant and intriguing trailers, TrailerPeak ensures users discover new movies that resonate with their individual interests.

Web Developer

Juli Arts

Jan 2019 - Present (4 years 11 months)

Step into a realm where stories unfold through brushstrokes from vibrant landscapes to intimate portraits, our artists will transform your story into visual poetry. Immerse yourself in artistry

Software Engineer

Schoolia

Jan 2023 - Present (11 months)

Schoolia is a comprehensive and user-friendly school management system designed to optimize administrative processes and automate essential tasks. With a range of essential functionalities, this software empowers educational institutions in Kenya to efficiently manage student information, admissions, timetables, attendance tracking, fee management, staff information, and more.
